**Bioactive Resources and Safe Sterilization USA** are excited to announce they have restructured their businesses under one Corporate name:

*Bioactive Services, llc*

Having begun in 2004, this family owned, woman run company has joined forces with a private investor group to help support the operations and fulfill its desire to expand services and capabilities. The company has exciting growth plans for the next few years and this restructuring will give them the resources to pursue that. This process has also brought in a new hands-on CEO to take over the day-to-day management, so that the former owners may spend their expertise on the new directions of growth.

After eighteen years of running all facets of the company, Divya Desai will now be able to place her sole focus into sales, which is her happy place! While Mayur Desai, after 11 years wearing multiple hats within SSUSA will be moving into the Presidential role where he holds a seat on the newly formed board for Bioactive Services, llc.

As the new CEO, Pratham Naik will be based out of the New Jersey offices. He brings with him a background in corporate management from both within & without the food industry. His desire is to help the Desai's grow the company, while maintaining the legacy of quality excellency in products and services, along with a relationship based business model long maintained within the marketplace.

Pratham will be attending Supply Side West 2022 trade show, so please come by and get acquainted!

**Bioactive Services, llc** is Looking forward to an exciting and *expanding* future of new facilities and new services!

---
